

A complete solution of tools **RPLT Installation**

A complete solution featuring five carefully selected hand tools – optimized for installation, crimping, stripping, and cutting. All tools are conveniently stored in a robust assortment box, ready for professional use in the field or workshop.

GSA0760 – Miniforce tool

Certified hand tool for symmetrical crimping of insulated terminals (0.5–6 mm²). Equipped with a ratchet mechanism, clearly marked crimping positions, and calibration capability. Designed to withstand at least 80,000 crimps.

CT10

Compact and lightweight cable cutter for copper and aluminum cables up to 10 mm in diameter. Hardened forged steel blades ensure clean cuts – ideal for precision work.

PEB0116RS

Tested and certified mechanical, self-adjusting crimping tool for end- (0,14-16 mm²) and TWIN-end (2×0,5-2×6 mm²) terminals with rotatable dies. Rotatable dies making both side and front feed possible.

QSP4470

Automatic Cable Stripping Plier for PUR-halogen-free cables, highly flexible TPE-U-cables, PUR/PVC-cables, PVC-cables, shielded and non-shielded, multi-stranded. Stripping of almost all cables from automation technology in the range of 4.40 to 7.0 mm Ø.

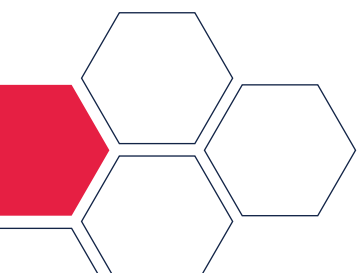

QSF-F

This wire stripper is suitable for all current insulated round cables from 8 to 13 mm diameter (5/16" - 1/2" Ø) on the building site, e.g. NYM 3×1,5 bis 5×2,5 mm², NHXMH 3×1,5 bis 5×2,5 mm² halogen free.
